Hebron Technical Engineering

SUMMARY

Dedicated student at NWU in Potchefstroom, South Africa, with a strong background in data analysis, software development, and technical communication. Demonstrated excellence in achieving course goals and high marks through diligent assignment completion and effective team collaboration. I am skilled in CAD software, Microsoft Office proficiency, web development, creativity and innovation, and decision making. Actively engaged in sports to enhance skills and conditioning. Aspiring to leverage academic achievements and technical skills towards a successful career in the tech industry.

PROJECTS

- **Pals System** – Full-stack veterinary clinic manager with ASP.NET, JavaScript UI, and TSQL backend. Built client profiles and scheduling, core logic in C#.
- **Medical Web App** – Secure platform for patient records and diagnostics. Role-based access with ASP.NET, TSQL, and C#.
- **BeetleCafApp** – Café system for orders, inventory, and feedback. Modular ASP.NET UI and C# backend.
- **Free State Student Portal** – Academic data hub with user authentication. Built with C# and ASP.NET.
- **Text Messaging App** – Firebase-based messaging system with cloud sync and login. Async communication in C#.
